Topic #1 — OP – SF Net 28.4 — July 15, 2021

From: Peter Clarkson (P.A.Clarkson@kent.ac.uk)

Subject: Announcement: Atul Dixit wins Gábor Szegő Prize 2021

I'm pleased to announce that the [Gábor Szegő Prize 2021](#) is awarded to Dr. Atul Dixit for his impressive scientific work solving problems related to number theory using special functions, in particular related to the work of Ramanujan. Atul did his PhD in Mathematics at the University of Illinois at Urbana-Champaign and his advisor was Bruce C. Berndt. Currently Atul is an Associate Professor in the Discipline of Mathematics at the Indian Institute of Technology Gandhinagar, India.

It is planned that the Gábor Szegő prize will be given to Atul at the OPSFA16 conference which is due to take place in Montréal, Canada in 2022.

The Gábor Szegő Prize 2021 committee was comprised of Kerstin Jordaan (University of South Africa), Adri Olde Daalhuis (University of Edinburgh, UK), Sarah Post (University of Hawaii), Yuan Xu (University of Oregon) and myself (chair).

Topic #2 — OP – SF Net 28.4 — July 15, 2021

From: Walter Van Assche (walter.vanassche@kuleuven.be)

Subject: Report on ITSF special issue for OPSFA15

Special issue: **OPSFA15 in Integral Transforms and Special Functions**

The 15th International Symposium on Orthogonal Polynomials, Special Functions and Applications (OPSFA15) was held in Hagenberg, Austria, from July 22 to July 26, 2019:

<https://www3.risc.jku.at/conferences/opsfa2019/>

The proceedings of this conference are now published as a special issue in [Integral Transforms and Special Functions](#). This special issue is in volume 32, in which numbers 5–8 are all part of the special issue. The guest editors are Galina Filipuk, Christoph Koutschan, Francisco Marcellán and Walter Van Assche, who wrote the introduction of the special issue (with a group picture taken at the conference). There are 20 refereed papers containing work presented at the conference, and of course the topics are orthogonal polynomials and their extensions (11 papers), special functions (4 papers), and applications (5 papers).

Contributions to OP-SF NET 28.5 should be sent by September 1, 2021.

OP-SF NET is an electronic newsletter of the SIAM Activity Group on Special Functions and Orthogonal Polynomials. We disseminate your contributions on anything of interest to the special functions and orthogonal polynomials community. This includes announcements of conferences, forthcoming books, new software, electronic archives, research questions, and job openings as well as news about new appointments, promotions, research visitors, awards and prizes. OP-SF Net is transmitted periodically through a post to SIAM-OPSF (OP-SF Talk).

SIAM-OPSF (OP-SF Talk) is a listserv of the SIAM Activity Group on Special Functions and Orthogonal Polynomials, which facilitates communication among members, and friends of the Activity Group. See the previous Topic. To post an item to the listserv, send e-mail to siam-opsf@siam.org.
