Computing vs Data

Computing per unit cost has doubled roughly every 18 months.

Performance Development

Space per unit cost has doubled roughly every 14 months.

So: data becomes exponentially uncomputable.

Mission

Can we create smart and safe data processing systems that can be tailored to diverse application needs?

- *Capacity*
 - *Bandwidth on demand, QoS, architectures, photonics, GPU, performance*
- *Capability*
 - *Programmability, virtualization, complexity, semantics, workflows*
- *Security*
 - *Anonymity, integrity of data in distributed data processing*
- *Sustainability*
 - *Greening infrastructure, awareness*
- *Resilience*
 - *Systems under attack, failures, disasters*
